PROFESSIONAL SUMMARY

I am a results-driven Software Engineering undergraduate with hands-on experience in full-stack web development and a strong passion for Artificial Intelligence. Blending technical depth with a keen eye for Software Quality Assurance (SQA), I consistently focus on delivering clean, maintainable, and highly reliable applications. I am actively seeking opportunities to contribute to impactful products and grow alongside talented engineering teams.

TECHNICAL SKILLS

- Programming: - JavaScript, React.js, Node.js, HTML/CSS, Flutter (MERN Stack)
- Database & SQL: - MySQL, MongoDB, Firebase
- API Integration & Testing: - Postman, REST APIs
- System Testing & QA: - Test case design, defect tracking, UAT
- Tools: - Git/GitHub, Vercel
- Consulting & Business Skills: - Requirements gathering, workflow design & configuration, UAT support, go-live preparation, project coordination, data validation, reporting

PROFESSIONAL EXPERIENCE

Information Technology / Software Engineer Intern – Sri Lanka Tea Board Dec 2025 – Jun 2026

- Compared production reports between legacy and new systems; presented findings to senior management.
- Performed software testing and defect identification, identifying missing fields and UI/UX inconsistencies.
- Prepared technical documentation and user guides to support end-users and development teams.
- Geo-coded geospatial data (Longitude, Latitude, DS/GN Division) for registered organizations to support land registration.
- Prepared technical reports and issue categorization documents; liaised with development teams and stakeholders.
- Developed Tea Land Registration Web Application (frontend and backend) not uploaded to GitHub due to security requirements.

PROJECT EXPERIENCE

KV-Audio Rentals Platform

Jan 2025 – Mar 2025

Tech: MongoDB, Express.js, React.js, Node.js (MERN Stack)

- Delivered a full-stack rental management system featuring a configurable admin panel and client-facing interface; designed database schemas and performed end-to-end workflow validation.
- Documented and version-controlled the complete solution on GitHub, from initial configuration through deployment.

Forever – E-Commerce Web App

Jul 2025 – Present

Tech: *React.js, Tailwind CSS*

- Contributing to frontend development with structured component architecture, responsive design testing, and iterative feature delivery.

Weather App – API Integration Project

Jun 2025 – Jul 2025

Tech: *JavaScript, React.js, OpenWeather API, Vercel*

- Built a real-time Weather App leveraging the OpenWeather API and hosted on Vercel, demonstrating skills in third-party API integration and cloud deployment.

Post Office Management System

Mar 2025 – Apr 2025

Tech: *Flutter, Node.js, Firebase*

- Led end-to-end system implementation covering a multi-role architecture (user & admin panels) encompassing requirements gathering, configuration, UAT, and go-live preparation — directly mirroring enterprise SaaS implementation phases.
- Coordinated a team of 4 developers, designed application workflows, and validated all data flows prior to deployment.

CERTIFICATIONS & TRAINING

- MERN Stack Development – SKYREK Academy | Full-stack implementation and deployment certification
- Software Quality Assurance – Board Infinity via Coursera
- Advanced React – Meta via Coursera | In Progress
- Organizing Committee Member – Brainwave Math Challenge (NSBM Math Club)
- Organizing Member – Annual Career Fair (NFORCE Club)

EDUCATION

B.Sc. (Special) Management Information Systems – 4th Year

Expected 2026

NSBM Green University

Relevant areas: Systems Analysis & Design, Database Management, Business Process Management, Information Systems
